ADVICE SHEET 08

Protecting your children's teeth

Brushing, toothpaste, fissure sealants and preventive check-ups.

BRUSHING

- Brush your child's teeth from the first tooth, morning and evening.
- Use a small amount of fluoride toothpaste suited to their age. Ask us for advice.

FISSURE SEALANTS

- It protects permanent molars from decay: a flowable resin is applied in the grooves, in a few minutes and painlessly.

PREVENTIVE CHECK-UPS

- Regular check-ups catch decay early. The "M'T dents" preventive check-ups are covered by French national health insurance (Assurance Maladie).

AVOID

- A bottle or sugary drinks at bedtime.
- Snacking throughout the day.
