ADVICE SHEET 06

Do your gums bleed when you brush?

The hygiene routine to get healthy gums back.

EVERY DAY

- Brush your teeth morning and evening with a soft brush, angled towards the gum.
- Clean between your teeth morning and evening with interdental brushes of the size you were given.

THE FIRST DAYS

- Bleeding at first is normal: it decreases within one to two weeks with regular cleaning. Do not stop.

RISK FACTORS

- Smoking is the main aggravating factor in gum disease.
- Diabetes must be well controlled: talk to your doctor.

FOLLOW-UP

- Regular maintenance sessions stop the disease from coming back.
