ADVICE SHEET 02

The first days after your implant

How to help the bone and gum heal around the implant.

ON THE DAY

- Apply cold to your cheek for 10 minutes at a time.
- Do not spit or rinse your mouth for 24 hours.
- Avoid physical effort, smoking and alcohol.

THE FOLLOWING DAYS

- Eat lukewarm, soft food on the side opposite the implant.
- Brush your other teeth normally; around the implant, follow the instructions given at the practice.
- Take the prescribed medication at the stated doses.
- Do not wear a removable denture over the area unless we have told you to.

SMOKING

- Smoking clearly increases the risk of implant failure: stopping, even temporarily, helps healing.

CALL THE PRACTICE IF

- the bleeding does not stop;
- pain or swelling gets worse after day 3;
- you have a fever.
